

Casualty Risk Engineering Services

Aviation Risk Improvement Resources

Swiss Re Corporate Solutions Risk Engineering Services (RES) leverages its expertise to help protect your business through loss prevention and best in class risk management practices.

Our value proposition

Our RES Casualty experts speak your language. We thoroughly understand your specific liability risk profiles, helping you to manage your risks and exposures efficiently and effectively, and to prevent losses that may arise in your evolving risk landscape.

As your aviation partner, we provide risk improvement consultation and tailored servicing. Our knowledge of regulations and risk management practices along with our global network of engineers allow us to effectively address your unique challenges. We're smarter together.

Risk Improvement Resources

We have compiled a list of the top aviation resources that will allow you to quickly research industry best practices to solve your risk mitigation needs.

Your dedicated risk engineer will customise a service plan within your budget and target resources to focus on key risks within your business.

Tailored services

These services include, but are not limited to:

- identifying key risk exposures within your organisation
- mitigating your liability exposure through focused risk analysis
- reducing losses by applying our broadly based loss experience knowledge of key industries
- developing your risk management systems
- reducing product recall incidents
- attaining the highest standards in health, safety, environmental and security management
- providing loss prevention training
