

## Casualty Risk Improvement Expertise

Swiss Re Corporate Solutions Risk Engineering Services (RES) leverages its expertise to help protect your business through loss prevention and best-in-class risk management practices.

### Our value proposition

Our RES Casualty experts speak your language. We thoroughly understand your specific liability risk profiles, helping you to manage your risks and exposures efficiently and effectively, and to prevent losses that may arise in your evolving risk landscape.

As your partner, we provide risk improvement consultation and tailored servicing. Our knowledge of your country's customs, regulations and risk management practices along with our global network of engineers allow us to effectively address your unique challenges. We're smarter together.

### Risk expertise

We provide support for standard and non-standard solutions. Key risk expertise you can benefit from includes:

- public liability, employer's liability
- products and services liability
- professional liability
- errors and omissions liability
- product recall
- environmental impairment liability

### Risk Engineering plan\*

RES offers flexible plans to satisfy all primary casualty needs. We assess general conditions and/or provide you with a customised, issue-specific assessment by applying proven risk management strategies, tools and methods to your organisation.

We will customise our service approach to meet your budget and target your specific risk management and improvement needs.

### Covered industries and sectors

We provide expertise in a wide range of industry sectors, including construction, cyber, electronics, energy (pipelines, petrochemical, refineries), life sciences (food, chemicals and medical technology), machinery, automotive, rail, retail and utilities.

### Tailored services\*

These services include, but are not limited to:

- identifying key risk exposures within your organisation
- mitigating your liability exposure through focused risk analysis
- risk improvement by applying our broad-based loss experience and knowledge of key industries
- improving your risk management systems
- reducing product recall incidents
- attaining the highest standards in health, safety, environmental and security management
- providing loss prevention training

### Contact
